

SAMPLE / DEMO TENDER DOCUMENT

Procurement of Industrial Safety Helmets

Prepared as a test input for SIH26108 – Standards Copilot

DEMO ONLY – NOT FOR ACTUAL PROCUREMENT

1. Procuring Organization

Department of Public Works – Sample Procurement Division

2. Procurement Requirement

The department intends to procure 1,000 industrial safety helmets for personnel engaged in construction, maintenance, civil works, and related site activities.

3. Purpose and Intended Use

The helmets are intended to provide head protection against hazards that may be encountered in construction and similar industrial work environments, including impact from falling objects.

4. Minimum Technical Requirements

- Helmet shall be suitable for industrial/construction use.
- Helmet shall provide protection against impact hazards associated with falling objects.
- Helmet shell shall be of durable construction suitable for the intended working environment.
- Helmet shall include a suitable internal harness/suspension arrangement.
- Helmet shall be adjustable for a range of head sizes appropriate for adult users.
- Helmet shall be capable of being securely retained during normal work activities.
- Materials and construction shall be suitable for the intended industrial environment.
- Supplier shall provide technical documentation describing material, construction, performance, care and maintenance.
- Supplier shall provide any test reports, conformity evidence, or certification documents applicable to the product.

5. Quantity

Item	Description	Quantity
1	Industrial Safety Helmets	1,000 Nos.

6. Standards and Compliance Requirement

The supplier shall identify and demonstrate conformity to the applicable Indian Standard(s) for the proposed industrial safety helmet. Where applicable, the tenderer shall provide evidence of conformity and any mandatory certification/licensing required under the applicable regulatory framework.

The procuring organization has intentionally not inserted a specific IS number in this sample document so that the Standards Copilot can identify the applicable standard(s) from the procurement requirement.

7. Testing and Evidence

- Provide relevant test reports from an appropriate laboratory where applicable.
- Provide product technical data sheets.
- Provide conformity/certification documents where mandatory or otherwise specified.
- Provide manufacturer/product identification and batch information.

8. Delivery and Inspection

Delivery shall be made to the designated department store. The supplied helmets may be subject to document verification, visual inspection, sampling and testing as specified by the procuring organization and applicable standards.

9. Bidder Documentation

- Manufacturer details
- Product model and catalogue
- Technical specification sheet
- Relevant test reports
- Conformity/certification evidence, where applicable
- Warranty and after-sales information

10. Commercial Information

Bid Quantity	1,000 Nos.
Delivery Period	Within 45 days of purchase order
Warranty	Minimum 12 months
Price Basis	To be quoted by bidder

11. Important Note for Standards Copilot Testing

Expected application behavior: extract the product, intended use, technical requirements and certification-related context; retrieve potentially applicable Indian Standards from its authoritative standards knowledge base; identify related standards and available amendment/version information; and present evidence and source links. The system must not invent a standard number or certification requirement.

12. Demo Data Notice

This document is synthetic and is created only to demonstrate the SIH26108 application workflow. It should not be used as an actual government tender or as a statement of current legal or procurement requirements.
